

WALL LAVATORY

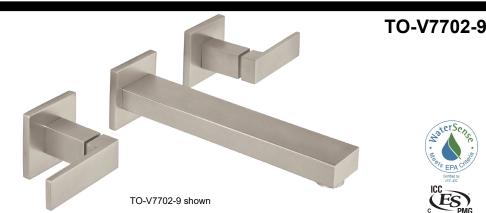

Features

- Over 28 finishes including 13 PVD finishes
- All brass construction
- 1.2 gpm (4.5 L/min) max flow rate Rough Valve (VL-R) sold separately

Codes/Standards Applicable

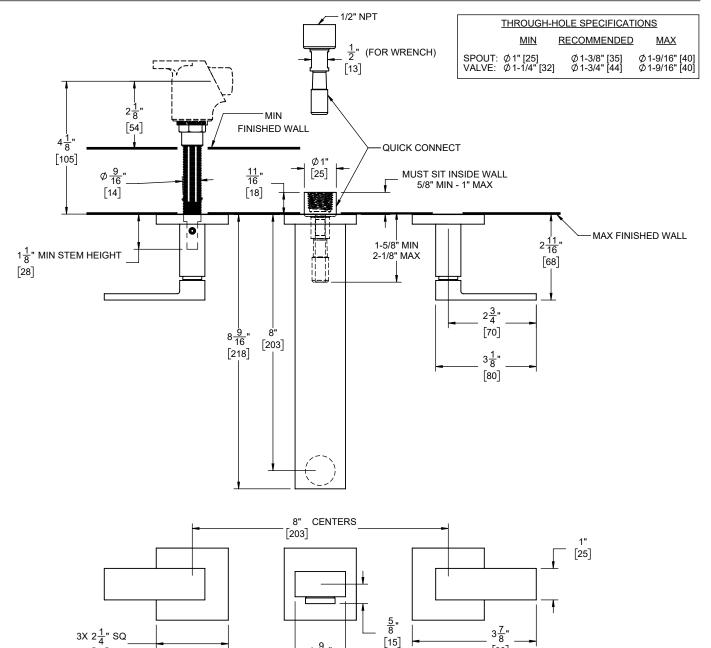

Product meets or exceeds the following:

- ASME A112.18.1/CSA B125.1
- NSF/ANSI 61 & NSF/ANSI 372
- CEC / DOE
- Commonwealth of MA
- EPA WaterSense High Efficiency Lavatory
- ADA compliant

Vessel Rough Valve Installation Instructions

CALIFORNIA FAUCETS RECOMMENDS THAT ALL PLUMBING PRODUCTS BE INSTALLED BY A LICENSED PROFESSIONAL

IMPORTANT: Read all instructions prior to installation and provide copy of instructions to consumer. Operating Specifications:

Recommended Supply Pressure: 20 to 70 psi *†

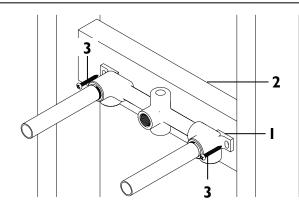

- * Operating pressures between hot and cold supplies should vary no more than 30 psi.
- † If water pressure exceeds 70 psi, install a Pressure-Reducing Valve (PRV).

INSTALLING VALVE

 Install BRACING (2) (2x4 stud recommended) at desired height and depth

IMPORTANT: Refer to table in page 2 for desired depth depending on trim series dimensions, "A" and "B"

 Secure VALVE (I) to BRACING (2) using SCREW (3) (not supplied)

2

SUPPLY CONNECTIONS

 Connect cold supply to COLD INLET (Ia) and connect hot supply to HOT INLET (Ib)

NOTE: Use thread sealant (not supplied) on all threaded connections

IMPORTANT: Flush supply lines prior to installation to prevent damage and malfunction of cartridge

WARNING: All soldering of fittings shall be performed a minimum of 4" away from VALVE (1)

- To check for leaks, install ½" NPT PLUG (4) (not supplied) into SPOUT OUTLET (Ic)
- Turn on water supply valve
- Remove MUDGAURDS (5)
- To "open" valve, turn STEM (Id) counterclockwise (CCW) for cold supply and STEM (Ie) clockwise (CW) for hot supply
- Check all connections for leaks
- Give these instructions to consumer for safe keeping

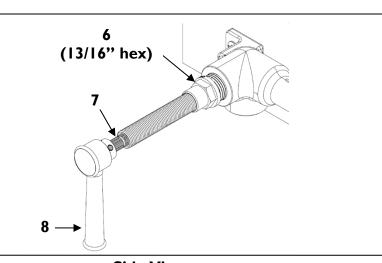

RE-ALIGNING CARTRIDGE

IMPORTANT: Shut off water supply before starting.

Slightly loosen in a CCW direction the cartridge NUT
 (6). Place HANDLE (8) on STEM (7) and tighten in a
 CW direction until desired alignment of handle is
 achieved. Retighten cartridge NUT (6) to factory torque
 setting of 14 ft-lbs

WARNING: Cartridge NUT **(6)** must be properly torqued to prevent possible failure and/or water damage.

4

DIMENSIONS

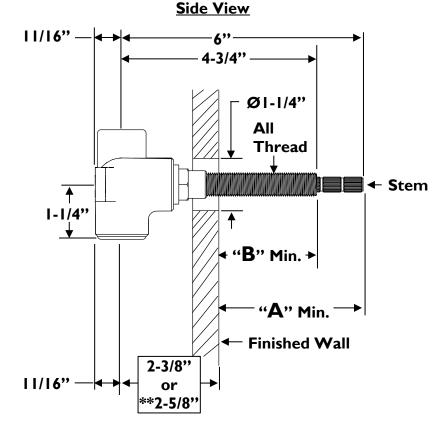

NOTE: When fitting handle it may be necessary to shorten <u>Stem</u> and/or <u>All Thread</u> to eliminate gap between handle & escutcheon.

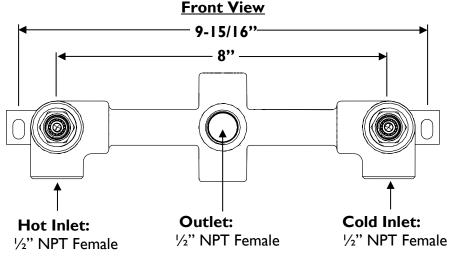

"A" = Stem overall length for Finished Wall

"B" = All Thread overall length from Finished Wall

Handle	"A"	"В"
Series #	Minimum	Minimum
30, 30X	1-3/4"	7/8"
33	2-1/2"	1-1/2"
34	2-7/16"	1-1/2"
35	2-1/2"	1-1/2"
**37, 37X	13/16"	5/16"
**38, 38X	13/16"	5/16"
